# OVERVIEW

The RKT8-HDX100 is the perfect solution for extending HDMI signals to a remote location up to 150 feet away. It is the ideal way to consolidate up to eight workstation computers into one location. It is fully compatible with MAC, PC and LINUX HDMI standards. Up to eight displays can be extended easily from a rack without the mess or expense of multiple extenders. Rather than buy multiple extenders for rack components, and having to find power strips or numerous power outlets for the adapters, the SmartAVI rack series of extenders allows for up to eight inputs and eight outputs and one power supply.

## RACK TO ENDPOINT

If your company uses a rack of source devices, whether it be computer servers, DVD players or other hardware, the RKT8-HDX100 allows you to run all of those components into one extension box that supports up to eight inputs/outputs on one power supply. In this example, source signals are being routed from a company rack through the RKT8-HDX100 to multiple displays. The rack utilizes SmartAVI's HDX-RX100 receiver unit at the end point to convert the Cat5e/6 feed back into an HDMI signal.

# HDX-100-RX

SmartAVI's HDX-100 is an innovative solution to extending any HDMI signal – be it a gaming console, Blu-Ray player, computer, etc. – over inexpensive Cat5/e6 STP cabling up to 150 feet away to one remote display and one local screen for real-time monitoring of content. This is the perfect solution for broadcasting high-definition media easily and inexpensively from a source to display screen for customers to view while keeping the CPU in a remote, secure location such as a computer room or back office of a business. Utilizing the HDX-100, users can monitor what's being shown to customers in real-time via a local display while users retain full control over the CPU or HDMI source, accessible only by key personnel. The HDX-100 is a compact unit that is easily integrated into a digital display network in a retail store, bar/lounge or other venue. The receiver unit is small and light, which makes inclusion into infrastructure very simple.
